About Me

My Portfolio

Dominique-Savio SAKOI

Cybersecurity

Holding a degree in Cybersecurity and an active CTF player, I am passionate about protecting information systems and implementing security strategies tailored to the needs of modern businesses. With a solid understanding of digital threats and emerging technologies, I strive to combine technical expertise with a strategic vision to build resilient, reliable infrastructures that comply with international standards.

Diplômes et Formations

Certified Associate Penetration Tester (CAPT)
Jan. 2026 HACKVISER .
The CAPT (Certified Associate Penetration Tester) certification, designed to teach penetration testing techniques through practical exercises based on real-life scenarios, officially attests to your technical skills in this field.

Bachelor of Science in Cybersecurity
D'oct. 2023 à août 2026 IPNET INSTITUTE OF TECHNOLOGY Lomé, MA, Togo
Cybersecurity (Information Technology)

Professional experiences

Cybersécurité – Security Engineer
Depuis oct. 2025 Miabeinnovation Lomé, Togo

- **Governance & Protection**: Defining and overseeing system and network security policies (firewalls, monitoring mechanisms).
- **Audit & Penetration Testing**: Conducting controlled penetration tests and vulnerability assessments on server and application environments.
- **Incident Management**: Proactive threat monitoring and incident response to ensure the integrity and availability of critical data.
- **Infrastructure & Cloud**: Administration of Linux/Windows servers and management of virtualized environments (VMware, Proxmox).
- **Reporting & Awareness Training**: Writing technical audit reports and training teams on best practices (phishing prevention, access management).

Deployment of a UTM (Unified Threat Management) system – Student Project Open Day (JPOPE)
D'avr. 2025 à juin 2025 IPNET INSTITUTE OF TECHNOLOGY Lomé, MA, Togo

- **Perimeter Architecture & Defense**: Design and deployment of a Unified Threat Management (UTM) solution based on OPNsense and FortiGate.
- **Integration of Critical Services**: Advanced configuration of firewalls, VPN tunnels, web filtering, and intrusion detection/prevention systems (IDS/IPS).
- **Offensive Security & Auditing**: Conducting penetration tests and simulated attacks to assess the robustness of the infrastructure and validate security policies.
- **System & Network Administration**: Configuration and securing of network services within a complex university environment.
- **Governance & Documentation**: Writing technical documentation and formulating strategic recommendations for continuous security optimization.

Systems & Security Administrator – Active Directory (University Project)
De déc. 2023 à jan. 2024 IPNET INSTITUTE OF TECHNOLOGY Lomé, MA, Togo

- **Architecture & Directory**: Design and deployment of a complete Active Directory infrastructure, including forest, domain, and organizational unit management.
- **Security Policy Management**: Implementation and hardening of Group Policy Objects (GPOs) to control access and secure workstation and server configurations.
- **Audit & Offensive Security**: Conducting targeted internal penetration tests on the directory, including enumeration and privilege escalation, to identify critical attack vectors.

Capture The Flag (CTF)
Nov. 2025 Agence Nationale de la Cybersécurité (ANCy) Lomé, MA, Togo
2-time finalist in the ANCY National Cybersecurity Competition CTF – 2024 and 2025
Participation in practical security challenges (slopes, exploitation, technical challenge resolution) demonstrating skills in offensive security, problem-solving and teamwork.

Skills

Professional skills & project management

- **Teamwork & Communication**: Collaboration with IT teams and other departments, interdepartmental communication.
- **Leadership & Mentoring**: Team coordination, supervision of technical projects.
- **Analysis & Problem Solving**: Analytical thinking, decision-making, and incident resolution.
- **Document Management & Reporting**: Drafting audit reports and technical documentation.
- **Resource Management**: Planning, allocation, and monitoring of human and material resources.

Informatique

Technical skills

- **Systems and network security**: administration and hardening of Windows/Linux systems, identity and access management (IAM), backup and business continuity.
- **Threat monitoring and detection**: SIEM, IDS/IPS, network monitoring.
- **Risk management and compliance**: identification, mitigation, and monitoring of security risks.

Tools & technologies

- **Penetration testing/analysis**: Kali Linux, Metasploit, Nmap, Wireshark, Burp Suite, OWASP ZAP, Nessus, OpenVAS
- **Networks & virtualization**: Cisco Packet Tracer, VirtualBox, VMware
- **Development & management**: Python (basics for security scripting), Git/GitHub
- **Other**: Network monitoring tools
