Dominique-Savio SAKOI

Junior Security Engineer | CAPT Certified (Hackviser) | Cisco Certified | Fortinet Certified | Offensive Mindset | Hardening | CTF Player

Lomé, Maritime Region, Togo

Summary

The digital threat landscape never sleeps, and that is exactly what drives me. What began as a curiosity about network operations at IPNET INSTITUTE OF TECHNOLOGY has evolved into a mission: understanding the attacker’s mindset to better defend infrastructures. I am daily shaping my profile as a Security Engineer & Pentester.

Currently pursuing a Bachelor’s degree in Cybersecurity, I go far beyond academic theory. I spend my days testing, breaking and securing systems. My journey is backed by hands-on certifications that validate my technical commitment :
Defensive Side: Proficiency in FortiGate (v7.4) firewall administration and Cisco networking fundamentals. Network defense through the implementation of UTM (Unified Threat Management) solutions and system Hardening (Active Directory).

Offensive Side: CAPT Certified (Certified Adversary Penetration Tester) by Hackviser. Daily practice in penetration testing to identify and remediate vulnerabilities before they can be exploited.

Innovative Project: I am currently developing a Total, Autonomous, and Immersive Defense Platform designed to automate incident response.

My goal is clear: to become a Security Engineer & Pentester. I am currently preparing for the CWSE (Certified Web Security Expert) certification to deepen my web application security expertise. In my spare time, I am an active CTF Players.

I am actively seeking an opportunity as a Junior SOC Analyst, Apprentice Pentester, or Junior Security Engineer. I am ready to bring my energy and technical skills to strengthen your company's resilience.

Let’s discuss how I can help secure your infrastructure!

Experience

MiabeInnovation
Cybersecurity - Agent
October 2025 - Present (1 year 1 month)
Lomé, Maritime Region, Togo

Hackviser
Certification Offensive Security (Pentesting)
January 2026 - January 2026 (1 month)

Executed vulnerability assessments and adversary simulations within CAPT (Hackviser) labs to identify critical system flaws.
Developed detailed technical reports on exploitation techniques and remediation strategies.

IPNET INSTITUTE OF TECHNOLOGY
4 months

Infrastructure & System Hardening
June 2025 - July 2025 (2 months)
Lomé, Maritime Region, Togo

Applied security benchmarks (GPOs) to harden Windows Server and Linux environments, reducing the overall attack surface.
Performed regular security audits to ensure system compliance with industry best practices.

Network Defense & UTM (Unified Threat Management)
April 2025 - May 2025 (2 months)
Lomé, Maritime Region, Togo

Configured and managed FortiGate (v7.4) and OPNsense solutions to provide comprehensive perimeter protection.
Deployed advanced features including IPS/IDS, Web Filtering, and VPN tunnels to ensure secure and monitored network traffic.
Optimized security rules to balance network performance with maximum protection against external threats.

IPNET INSTITUTE OF TECHNOLOGY
Active Directory Security & Administration

December 2023 - January 2024 (2 months)
Lomé, Maritime Region, Togo

Designed and deployed secure AD architectures, focusing on identity management and access control.
Implemented the "Principle of Least Privilege" (PoLP) to mitigate internal threats and privilege escalation.

Education

IPNET INSTITUTE OF TECHNOLOGY

Licence professionnelle, Cyber-Sécurité · (October 2023)
